	Description of Deliverables	OOM	Conceptual	Preliminary	Detailed	IFC	Closeout
X	Scope of Work document (Conceptual)		See Comments				
X	· Ratings & Dimensions for Major Equipment (Standard Equipment)		NA				
X	· Above Grade Electrical BOM (Major Equipment & Long Lead Time Electrical)		NA				
X	· Below Grade BOM (Major, Long Lead Civil Materials)		NA				
X	· Identification of Unique Requirements, i.e. (access bridges, station service, etc.)		NA				
X	· Define BPS Separation Requirements (Conceptual)		NA				
X	· Physical Security General Requirements (Including ballistic rated enclosures)		NA				
X	· IEC 61850 Requirements (Conceptual)		NA				
X	· Known Existing Site Specific Conditions		NA				
X	· Establish Future Expansion needs		NA				
X	· List of Other Projects with Potential to Interfere with Design or Construction		NA				
-	· High-Level (Phase 1) review of Environmental risk and possible environmental remediation		NA				
-	· Routing of Lines into and out of Substation (Confirmation of SOW with T-Line)		NA				
X	· Wall & Foundation Plan & Table (Assumed foundation quantities, dimensions and concrete volumes)		NA				
-	· Assumed Soil Resistivity		NA				
X	· Assumed ground grid modifications		NA				
X	· Desktop Topographical Survey - Cut & Fill (New or Expanded Site)		NA				
-	· Evaluation of DC Battery system and Loading		NA				
-	· Evaluation of Station Services & Impact to Existing Facilities		NA				
X	· Structure Table		NA				
-	· Define X/R Ratio		NA				
-	· Define Fault Current		NA				
X	General Arrangement shown on Google Earth showing added scope		X				
X	Nomenclature / Switching One-Line Diagram		X				
X	Equipment Rating One Line (and/or equipment thermal ratings tables)		NA				
X	Substation Entry Plan (driveway and drive path modifications)		X				
-	Transformer Spill Containment		NA				
X	Control Enclosure Layout/Space Evaluation		NA				
-	Battery Enclosure Layout		X				
-	Below Grade Raceway Plan or Sketch		NA				
-	Assumed Volume of Rock (Cu Yds)		NA				
-	Equipment Rating One Line (and/or equipment thermal ratings tables)		See Comments				
X	Constructability Review (Conceptual)		X				
X	Substation Risk Identification & Proposed Mitigation (Conceptual, Input to Risk Matrix)		NA				
X	Budgetary Quotations for Specialty Major Materials		See Comments				
-	SUB 099 Site Data Table		NA				
-	RFP Package for Detailed Engineering Services (if required)		See Comments				
X	Deliverables Checklist (Conceptual, this document)		X				

Comments

The Hyde Park BESS project is finalizing the RFP to go out to bid for an EPC (Engineer, Procure, & Construct) contract for this BESS facility. Coordination will be done with the Cummings Highway new substation. As this project will be connecting at the distribution feeders at the street, no substation work is required until the new station is constructed. The BESS will be placed in a location that the cutover to the station can be done if the final design requires it to be cut over to allow the BESS to support more than one feeder location. Coordination with the project team will also take place to make sure that the location of the BESS does not need to move when construction of the new substation takes place.

Automated Electronic Signature of Engineer Assigned to the Project and the Designated QA/QC Reviewer
